The of most bushes are drawn on the map, but there are some small bushes that cannot be represented.

Mapping – sighting lines:

We have checked the majority of sighting lines between objects, but you need to take into consideration the fact that due to a lot of objects in small areas, it was sometimes necessary to maintain correct relative positions of objects, so it is not always possible to keep the exact position of objects due to the ISSprOM requirement on minimum gaps and dimensions. The technique to identify two or more reference points on the map that line up with a feature on the map is not a recommended method for finding the right answer and will not be accepted in any complaints.

Terrain:

TempO and PreO Sprint: Foot Golf Park with lot of smaller relief elements and vegetation typical of golf courses.

PreO: Arboretum, with lot of special plant objects, lot of paths, forest of varying density.

Old maps: [TempO OB 2024 - Kecskemét](#) and [Homokháti Kupa Sprint 2025](#)
